

Intro to SQL

ISS Lab 4

Types of Databases

Relational Database

Key features of relational databases

Related data is stored in rows and columns in one table.

SQL (Structured Query Language)

A table uses columns to define the information being stored and rows for the actual data.

Non-Relational Database

Key/Value

Graph

Column

Document

What is SQL?

- Structured Query Language
- Relational database queries
- Tool for organizing, managing, and retrieving archived data from a computer database.
- 2 categories of SQL commands:
 - Data Definition Language (DDL)
 - Data Manipulation Language (DML)

SQL Categories

DDL

Commands used to create the database structure

Command
1. CREATE Creates a new table, a view of a table, or other object in the database.
2. ALTER Modifies an existing database object, such as a table
DROP Deletes an entire table, a view of a table, or other objects in the database.

DML

A relational database can be updated with new data using data manipulation language

Command
1. SELECT Retrieves certain records from one or more tables.
2. INSERT Creates a record.
3. UPDATE Modifies records.
4. DELETE Deletes records.

Creating the database

- Query:
 - `CREATE DATABASE GeeksForGeeks;`
- Output:

```
mysql> CREATE DATABASE GEEKSFORGEEKS;  
Query OK, 1 row affected (0.02 sec)  
  
mysql> |
```

Verifying the database

- Query:
 - `SHOW DATABASES;`

- Output:

```
mysql> SHOW DATABASES;
+-----+
| Database |
+-----+
| book_shop |
| employee_directory |
| geeksforgeeks |
| ig_clone |
| information_schema |
| inst_clone |
| mysql |
| performance_schema |
| sakila |
+-----+
```

Deleting the database

- Query:
 - `DROP DATABASE GeeksForGeeks;`
- Output:

```
mysql> DROP DATABASE GeeksForGeeks;  
Query OK, 4 rows affected (0.09 sec)  
  
mysql> |
```

Using the database

- Query:
 - `USE GEEKSFORGEEKS;`
- Output:

```
mysql> USE GEEKSFORGEEKS;  
Database changed  
mysql> |
```

Creating a Table

- Query:

- ```
CREATE TABLE EMPLOYEE(

 EMP_ID INT,

 NAME VARCHAR(20),

 DOB DATE,

 AGE INT,

 SALARY DECIMAL(7,2));
```

- Output:

```
mysql> CREATE TABLE EMPLOYEE(
 -> EMP_ID INT,
 -> NAME VARCHAR(20),
 -> DOB DATE,
 -> AGE INT,
 -> SALARY DECIMAL(7,2));
Query OK, 0 rows affected (0.02 sec)

mysql> |
```

# Adding Data into a Table

- Query:

```
INSERT INTO categories
(
 CategoryID, CategoryName
)
VALUES
(
 1, 'Beverages'
),
(
 2, 'Condiments', 'Sweet and
Savoury sauces'
);
```

- Output:

```
mysql> CREATE TABLE EMPLOYEE(
-> EMP_ID INT,
-> NAME VARCHAR(20),
-> DOB DATE,
-> AGE INT,
-> SALARY DECIMAL(7,2));
Query OK, 0 rows affected (0.02 sec)

mysql> |
```

# View the Final Table

- Query:

```
SELECT * FROM categories; (asterisks represent all attributes of the table)
```

- Output:

|   | CategoryID ▾ | CategoryName ▾ | ItemDescription ▾        |
|---|--------------|----------------|--------------------------|
| 1 | 1            | Beverages      | SoftDrink                |
| 2 | 2            | Condiments     | Sweet and Savoury sauces |

# SELECT Query

| CustomerID | CustomerName             | LastName | Country   | Age | Phone      |
|------------|--------------------------|----------|-----------|-----|------------|
| 1          | Shubham                  | Thakur   | India     | 23  | xxxxxxxxxx |
| 2          | Aman                     | Chopra   | Australia | 21  | xxxxxxxxxx |
| 3          | Naveen                   | Tulasi   | Sri lanka | 24  | xxxxxxxxxx |
| 4          | Aditya                   | Arpan    | Austria   | 21  | xxxxxxxxxx |
| 5          | Nishant. Salchichas S.A. | Jain     | Spain     | 22  | xxxxxxxxxx |

- Query:

```
SELECT CustomerName, LastName FROM Customer;
```

- Output:

| CustomerName             | LastName |
|--------------------------|----------|
| Shubham                  | Thakur   |
| Aman                     | Chopra   |
| Naveen                   | Tulasi   |
| Aditya                   | Arpan    |
| Nishant. Salchichas S.A. | Jain     |

# SELECT Query with WHERE Clause

| CustomerID | CustomerName             | LastName | Country   | Age | Phone      |
|------------|--------------------------|----------|-----------|-----|------------|
| 1          | Shubham                  | Thakur   | India     | 23  | xxxxxxxxxx |
| 2          | Aman                     | Chopra   | Australia | 21  | xxxxxxxxxx |
| 3          | Naveen                   | Tulasi   | Sri lanka | 24  | xxxxxxxxxx |
| 4          | Aditya                   | Arpan    | Austria   | 21  | xxxxxxxxxx |
| 5          | Nishant. Salchichas S.A. | Jain     | Spain     | 22  | xxxxxxxxxx |

- Query:

```
SELECT CustomerName

FROM Customer

WHERE Age = '21';
```

- Output:

| CustomerName |
|--------------|
| Aman         |
| Aditya       |

# SELECT Query with GROUP BY Clause

| CustomerID | CustomerName             | LastName | Country   | Age | Phone      |
|------------|--------------------------|----------|-----------|-----|------------|
| 1          | Shubham                  | Thakur   | India     | 23  | xxxxxxxxxx |
| 2          | Aman                     | Chopra   | Australia | 21  | xxxxxxxxxx |
| 3          | Naveen                   | Tulasi   | Sri lanka | 24  | xxxxxxxxxx |
| 4          | Aditya                   | Arpan    | Austria   | 21  | xxxxxxxxxx |
| 5          | Nishant. Salchichas S.A. | Jain     | Spain     | 22  | xxxxxxxxxx |

- Query:

```
SELECT COUNT (item),
Customer_id FROM Orders
GROUP BY customer_id;
```

- Output:

| COUNT (item) | customer_id |
|--------------|-------------|
| 1            | 4           |
| 1            | 4           |
| 1            | 3           |
| 1            | 1           |
| 1            | 2           |

# SELECT Query with HAVING Clause

|   | EmployeeId ▾ | Name ▾ | Gender ▾ | Salary ▾ | Department ▾ | Experience ▾ |
|---|--------------|--------|----------|----------|--------------|--------------|
| 1 | 1            | Rachit | M        | 50000    | Engineering  | 6 year       |
| 2 | 2            | Shobit | M        | 37000    | HR           | 3 year       |
| 3 | 3            | Isha   | F        | 56000    | Sales        | 7 year       |
| 4 | 4            | Devi   | F        | 43000    | Management   | 4 year       |
| 5 | 5            | Akhil  | M        | 90000    | Engineering  | 15 year      |

- Query:

```
SELECT Department, sum(Salary) as
Salary

FROM employee

GROUP BY department

HAVING SUM(Salary) >= 50000;
```

- Output:

|   | Department ▾ | Salary ▾ |
|---|--------------|----------|
| 1 | Engineering  | 140000   |
| 2 | Sales        | 56000    |

# SELECT Query with ORDER BY Clause

- Query:

```
SELECT * FROM Customer

ORDER BY Age DESC;
```

- Output:

| CustomerID | CustomerName             | LastName | Country   | Age | Phone      |
|------------|--------------------------|----------|-----------|-----|------------|
| 3          | Naveen                   | Tulasi   | Sri lanka | 24  | xxxxxxxxxx |
| 1          | Shubham                  | Thakur   | India     | 23  | xxxxxxxxxx |
| 5          | Nishant. Salchichas S.A. | Jain     | Spain     | 22  | xxxxxxxxxx |
| 2          | Aman                     | Chopra   | Australia | 21  | xxxxxxxxxx |
| 4          | Aditya                   | Arpan    | Austria   | 21  | xxxxxxxxxx |

# SQL Operators

- AND
- OR
- LIKE
- IN
- NOT
- NOT EQUAL
- IS NULL
- UNION
- EXCEPT
- INTERSECT

Example:

```
SELECT * FROM table_name
WHERE column_name IS NULL;
```

```
SELECT SupplierID, Name, Address
FROM Suppliers
WHERE Name LIKE 'Ca%';
```

# SQL Aggregate Functions

- COUNT()
- SUM()
- MIN()
- MAX()
- AVG()

Example:

```
SELECT SUM(Salary)
FROM GeeksTab;
```

```
SELECT AVG(Salary)
FROM GeeksTab;
```

# Lab Assignment

(Last one yay)

Submission Format: <RollNo>.pdf on Moodle.

The pdf should contain queries and solutions as mentioned in the assignment sheet.

Deadline: Today 11:59 PM.
