HTML and CSS Practice Assignment

Jan 12

Assignment Overview

Develop an HTML webpage incorporating the following elements and styles. Your code should be clean, well-commented, and follow standard web development practices.

1. **Headings and Text Alignment:**

   - Create a level 2 Heading .
   - Align a paragraph discussing the latest HTML5 features to the right.

2. **Font Styles and Lists:**

   - Write a paragraph in Comic Sans font about web fonts, with font size 20 pixels.
   - Create an unordered list (square bullets) listing three CSS frameworks.

3. **Images and Hyperlinks:**

   - Add an image of a web browser logo to the left side of a paragraph that describes its features. The image should be 400 pixels wide.
   - Insert a hyperlink to a website.

4. **Tables and Colors:**

   - Construct a table with headings and alternate row colors.
   - Compose a paragraph with a green background and white text.

5. **Horizontal Lines and Subscripts:**

   - Insert a horizontal line with 70 percent width of the browser window.

6. **Preformatted Text and Paragraph Formatting:**

   - Display a block of preformatted text containing a simple code snippet.
   - Emphasize a paragraph about HTML in web development using the `<em>` tag.

7. **Ordered List and Text Styles:**

   - Make an ordered list (numbered 1, 2, 3)
   - Center a bold paragraph.

8. **Advanced Table Layout:**

   - Design a table with merged cells in the header and custom cell borders.
